INTRODUCTION

The Telecom Telefinder 016 Paging Network is the largest terrestrial paging network in Australia, designed to provide paging and message services to people on the move.

The Australia-wide network is divided into 15 geographical areas covering over 100 major metropolitan and country service localities.

Multi-Area-Paging (MAP) allows you to define (and pay for) exactly the extent of paging coverage you require. From a single capital city to every capital city, wherever you are in your MAP area any caller can reach you (at the cost of a local call only) by simply dialling your unique 016 pager number. Up to 15 MAP areas can be selected enabling you to be contacted wherever you go. MAP coverage/charging areas available are:

NSW – N1, N2 and N3	WA – W1 and W2
VIC – V1, V2 and V3	SA – S1 and S2
QLD – Q1, Q2 and Q3	NT – S3
	TAS – T1

Maps of service localities, their relevant MAP coverage/charging areas and transmitter locations on a State basis, are contained in this booklet.

Paging coverage usually extends up to 40 km from the radio paging transmitter but may vary according to local topography.

NEW SOUTH WALES

MAP AREA	PAGING CENTRE	TRANSMITTER LOCATIONS
N1	Sydney	Telecom House Waverley Cecil Park Dural
N1	Gosford	Mt Elliott
N2	Canberra	Black Mountain
N2	Albury/Wodonga	Eastern Hill
N3	Armidale	Kelly's Plains
N3	Ballina	Ballina Water Tower
N3	Bathurst	Mt Panorama
N1	Campbelltown	Razor Back
N3	Coffs Harbour	Thompsons Hill
N3	Dubbo	Buninyong
